COMMON QUESTIONS ABOUT CARDIAC MEDICATIONS

Note: This is a working draft and there are duplicates that demonstrate different ways questions might be asked and answered.

Question	Answer
I want to know more about my <Medication_Synonyms>	Your prescription medications are very important for your heart health. If you want to know more about your medications you can do a virtual check-in with your doctor or pharmacist.
I have side-effects from my <Medication_Synonyms>	If you are worried that you have side effects from your medications do a virtual check in with your doctor or pharmacist who can answer any questions you have. Don't forget, do not stop any medications until you have spoken with your doctor or pharmacist. If you feel very ill, have chest pain, or a high fever, or difficulty breathing even when seated or lying down, you should get immediate medical help.
Why am I not on this <Medication_Synonyms>	Every patient is different and their doctor prescribes the medications they need. They are not missing out just because someone they know who has had the same operation is on different medications. Remember that patients cannot take someone else's heart medications as it is very dangerous.
I don't think my <Medication_Synonyms> are working	Some of a patient's heart medications work over a very long time. Patients can't tell if some of them are working just by how they feel today. That is why it is important for patients to have blood tests and other check-ups when their doctors tell them to. That is the only way to tell if these medications are working. Any patient who thinks their symptoms have returned you seek urgent medical attention.
I've heard my <Medication_Synonyms> are dangerous	If you are worried about your medications you can do a virtual check in with your doctor or pharmacist who can answer any questions you have. Don't forget, do not stop any medications until you have spoken with your doctor or pharmacist. Stopping medications suddenly can be dangerous.
I'm worried that I'm taking too many tablets	Your prescription medications are very important for your heart health. If you want to know more about your medications you can do a virtual check-in with your doctor or pharmacist.
I'm worried about long term side effects	If you are worried that you have side effects from your medications do a virtual check in with your doctor or pharmacist who can answer any questions you have. Don't forget, do not stop any medications until you have spoken with your doctor or pharmacist. If you feel very ill, have chest pain, or a high fever, or difficulty breathing even when seated or lying down, you should get immediate medical help.
I don't know how to travel with my <Medication_Synonyms>	If you are travelling overseas you need to check if the countries you are visiting prohibit your medications. This is especially important for pain killers. You will need a letter from your doctor listing all medications and the dosages. It is a good idea to take unopened packages of your drugs. Customs officers might not let you take unpackaged drugs into the country. Always declare the drugs you are taking into the country. If you want to know more about travelling with your drugs you can do a virtual check-in with your doctor or pharmacist.

Can I take a holiday from my <Medication_Synonyms>	If you are worried that you have side effects from your medications or want to stop taking them for other reasons do a virtual check in with your doctor or pharmacist who can answer any questions you have. Don't forget, do not stop any medications until you have spoken with your doctor or pharmacist. Stopping medications suddenly can be dangerous.
Can I reduce the dose of the <Medication_Synonyms>	If you are worried about your medications you can do a virtual check in with your doctor or pharmacist who can answer any questions you have. Don't forget, do not stop any medications until you have spoken with your doctor or pharmacist. Stopping medications suddenly can be dangerous.
Is there an alternative to the <Medication_Synonyms> I am taking	If you are worried about your medications you can do a virtual check in with your doctor or pharmacist who can answer any questions you have. Don't forget, do not stop any medications until you have spoken with your doctor or pharmacist. Stopping medications suddenly can be dangerous.
Can I take multi-vitamins with my <Medication_Synonyms>	If you are worried that you might have interactions from your medications do a virtual check in with your doctor or pharmacist who can answer any questions you have. Interactions can be with other prescription drugs, with over the counter vitamins and remedies and with some common foods.
Can I take multi-vitamins with my condition	If you are worried that you might have interactions from your medications do a virtual check in with your doctor or pharmacist who can answer any questions you have. Interactions can be with other prescription drugs, with over the counter vitamins and remedies and with some common foods.
Does this supplement help reduce side effects	If you are worried about your medications you can do a virtual check in with your doctor or pharmacist who can answer any questions you have. Don't forget, do not stop any medications or take any supplements until you have spoken with your doctor or pharmacist. Stopping medications suddenly can be dangerous.
I've heard my medication (painkiller) is addictive	If you are worried about your medications you can do a virtual check in with your doctor or pharmacist who can answer any questions you have. Don't forget, do not stop any medications until you have spoken with your doctor or pharmacist. Stopping medications suddenly can be dangerous.
Is this food safe to have with my <Medication_Synonyms>	If you are worried that you might have interactions from your medications do a virtual check in with your doctor or pharmacist who can answer any questions you have. Interactions can be with other prescription drugs, with over the counter vitamins and remedies and with some common foods.
I can't afford my <Medication_Synonyms>	If you are worried about your medications you can do a virtual check in with your doctor or pharmacist who can answer any questions you have. Don't forget, do not stop any medications until you have spoken with your doctor or pharmacist. Stopping medications suddenly can be dangerous.
I've been told this <Medication_Synonyms> doesn't work	If you are worried about your medications you can do a virtual check in with your doctor or pharmacist who can answer any questions you have. Don't forget, do not stop any medications until you have spoken with your doctor or pharmacist. Stopping medications suddenly can be dangerous.
